Filing Insurance

It is the practice of this office to file our insurance as a courtesy to you. We ask that you provide our office with the current insurance information upon arrival of each visit. We will then submit all appropriate documents and information to the insurance company or companies if a secondary insurance is on file. As we process the majority of claims electronically, most claims are paid within 30 days. However, on occasion, some insurances delay payment for various reasons, such as trying to determine pre-existing conditions or trying to determine if the patient might have other insurance. If the insurance has not paid your claim within 90 days of filing by our office, the patient will then become responsible for the total amount of the bill. Should the insurance pay afterwards, due to phone calls or appeals, Dr. Davis will reimburse any applicable funds to the patient or responsible party if the patient is a minor.

Thank you for your understanding of the billing policy of this office.
